ARTICLE DOES NOT WORK

Hello from Australia

Have recently come upon the works and writings of Glenn Kimball-Kimball college. I have a better understanding these days of how the world functions. It would appear that G.kimball was not well appreciated in some circles due to his diligence at uncovering the facts behind the facts. I notice that Kimball college still has a website but that the class lessons are not available. I would appreciate your help in my quest to recover these lessons for this part of the world. Would you be able to direct me to someone to whom I may purchase these lessons? Is there someone you know that owns these lessons and could copy them- I would then reimburse the Kimball family as they would have the copyright.?

To: All

This stone is new to me but definitely has a message inscribed in ogham. I googled it using <"halo rock"yoncalla> and got an artist rendition on this link:

<http://jacobsgallery.org/exhibits/>. WEBSITE DOES NOT WORK

The Yoncalla Historical Society is writing a local history on Douglas County, Oregon. I am writing a chapter on the "Indian Rock" or "Halo Rock" history. Enclosed are photos of the said rock. Your expertise is requested on your professional thoughts. Are these possible "Runes" of Nordic Anglo-Saxon origins? or? The Rock is located near Yoncalla, Oregon. The local Calapooya tribe consider it sacred, and say was always here (before their time?) Please advise us with your impressions.

Thank you very much for any input you can give.

Peggy Eickman
Yoncalla Historical Society

A giant mystery: 18 strange giant skeletons found in Wisconsin: Sons of god; Men of renown -- Secret History -- Sott.net

Interesting article! Thanks for sharing this James...one wonders why giants and their discoveries are hidden....what's everyone's take on this? Interesting the the writer seems to think evolutionists would think this as a blow to their theory...could be one reason.

Gentlemen,

Is it really a "SECRET" that Genetic Drift/Variation occurs (has always occurred/will continue to occur) in human populations resulting in Gigantism (see http://en.wikipedia.org/wiki/List_of_humans_with_gigantism) and Dwarfism?

Vance

Friends, apparently both dwarfs and giants were commonly found in graves and mounds. If there was drift, it was substantial, at least on this continent. At the time that these folk were living and building, amazing things (by our reckoning) were happening to the planet: 10,000 years ago--massive melting of the glaciers; comets or asteroids colliding with the planet; huge waves of glacial melt and substantial tsunamis from the stellar debris and volcanic disturbance; perhaps, manmade catastrophes, too, depending on whether you buy into ancient Indian and Sumerian texts.

The question is: is our collective history as "normal" as even we would like it to sometimes appear? This is a good time to keep an open mind and look at the evidence, including the

outliers--and there are an accumulating and very, very many of them, that indicate that we really know very little about our own human origins.

Glad you liked the article. Now....wouldn't you just love to have open access to all of those crates of artifacts stored and forgotten in the Smithsonian? And....how can we, as a free people with a right to know our past, ever have access to them?

Buzz

Such an fascinating and interesting subject! Here's a possible theory of why the giants have been kept hidden. Regarding the spread of giants over the whole earth, might it be possible that SOME (obviously not all) had descended from an intermixing of Israelites from the Northern Kingdom of Israel(not Jews from Southern Kingdom of Judah) and the pagan Philistines and Amorites (there were male shrine prostitutes in the land of Judah and possibly Israel: see 1 kings 22:46)? Jeremiah(KJV) told them to set up waymarks and build high heaps to mark their routes around the earth(see Jer.31:21). Ezekiel says they built mounds for themselves at every street and in the valleys (see Ezek.16 NIV). Ezekiel also states that they wandered over all the mountains and on every high hill throughout the earth (see Ezek. 34:6 NIV). There was also a very frightening destruction from God upon many or most(not all)of these wandering pagan outcast-Israelites. Fire from heaven, plague, famine and sword (see Lamentations 1:13 and Ezek. Chapters 6&7 NIV). Unlike the destruction of Sodom, this judgement seemed to be relentless while it was occurring (see Lamentations 4:6-9 NIV). Ezekiel tells a very haunting story in chapters 6-7. Of civilizations that abruptly came to a halt and disappeared. This seems similar to what happened to different known ancient cultures we know of today. To name a few: pre-Inca, Chacha-poya of northern Peru, Aztecs, Mayas, the Anasazi, the Mound Building cultures, etc. In referring to these same Israelites, Ezekiel states (7:24 NIV) that God will put an end to the pride of the Mighty. This is just a theory that may never be known for sure. Also, on a side note, the northern pagan Israelites were cast out for worshiping the heavenly bodies(stars, sun and moon) etc.(see II Kings 17 NIV) It seems that most mound/earthwork complexes and chambers align with the heavenly bodies. This sort of seems "way out there" (and it just might be!) but just thought I'd share. Best regards, Trav.

In a book that was once a standard text for learning about mound builders...I believe it was titled, *The Moundbuilders*, and it was, I believe, by Silverberg, it was stated that the "Adena" Indians (that is the first major moundbuilder group in the Mid West --named after the site in Ohio near the Governor's mansion, named Adena) were very tall...that their skeletons were often 7 feet. For anyone too young to remember, on this list, we used to be able to look at the old skeletons, but Indian objections to digging up their apparent or supposed ancestors stopped that practice. I don't know where those skeletons are now. I believe later archeologists claimed that the early measurements were wrong...were based on the skeletons being laid out... stretched out in such a way so they seemed taller. I believe (and I did see some of the ancient skeletons years ago) the heads of "Adena" people were wrapped and elongated.

So, is it possible these skeletons were "Adena"?

Jack in Chillicothe

The story of giants led me to another interesting observation.

Please read: The origin of Patagonia, land of giants in South America.
<http://www.lawrence.edu/news/pubs/lt/fall04/giants.shtml>

<http://patagoniamonsters.blogspot.com/2009/11/patagon-giants-part-1.html>

Tierra de Patagones is found on the maps of Gutierrez (1562) and Patagones Regio Gigantum on Ortelius(1587). Linguistically, Patagonia does not seem to be derived from European language other than pata=foot (Portuguese/Spanish), which is a "stretch" to be translated as giant. There is no etymological association of "gone" to Portuguese/Spanish. So, apparently it is a name given by the natives.

There is a name "Badawan, country of tall people" in the 1602 world map attributed to Matteo Ricci. Actually the map was drawn by Chinese in 1430s. Badawan is my phonetic transliteration from Chinese label. It is phonetically similar to Patagone except the last sound. Ricci did add a few names to this map. If Patagonia is what he wanted to add, why is it transliterated differently?

On the 1602 map, the name extends all along the east slope of the Andes between Chile and Argentine, while on the maps of Gutierrez and Ortelius, the name Patagone is at the southern tip of Argentine.

The shape of South America on the 1602 Chinese map is much closer to the modern maps than the other two. Apparently Ricci could not have done any survey of South America to improve the geography.

Thus, by the above analysis, the 1602 Chinese world map is not a copy of Gutierrez or Ortelius. What the 1602 map reflects is what Chinese knew about South America in 1430s. Patagone could be a mistranslation from Chinese Badawan, the original native sound.

The 1544 Battista Agnese World map shows the route of Magellan. After passing the strait, he did not follow the Chilean coast line, which would be the safest way for any explorer to a new place. Instead, he steered northwest directly to reach Asia, violating the logic of an explorer. He is the first European to attempt crossing the Pacific and succeeded in one try. Unless someone had prior knowledge of this route. Where did Magellan get the idea? Someone must have already been through this route and left the information.

The Batissta Agnes world map has clearly marked longitudes. The accurate measurement of longitudes was not available until 1773. How did Batissta come up with the longitudes in 1544, when 1562 Gutierrez map still did not have longitude markings?

My discussion has deviated quite a bit from giants. What it shows is how history was written or rewritten. We must distinguish truth from hearsay.

The Ancient Earthworks Society, Inc.

News and Events - March 2013

**We invite you to the AES monthly meeting
Saturday, March 16th, 2013 from 11am to 2:30pm**

Guest Speaker: Jack Steinbring
The Hensler Rock Art Site

Please join us at Elie's this Saturday, March 16 as we welcome Dr. Jack Steinbring, internationally recognized Rock Art expert and anthropologist. Dr. Steinbring will be giving a presentation on his work at the Hensler Rock Art Site outside Waterloo, Wisconsin. Dr. Steinbring started working on the site in the mid 80's. He will detail all the petroglyphs from the site stretching from 10,000 + years to Mississippian Times.

In addition to Jack's work, AES Research Director Jim Scherz has also been working on mapping the site. The maps of the site have very recently been completed, and Jim hopes to have them available at the meeting. We are grateful to AES volunteers Dave Weier and Buck Trawicky for their assistance with these projects.

Jack Steinbring founded the Department of Anthropology at the University of Winnipeg, Canada, and taught there for 31 years. After his retirement in 1994, he returned to his hometown of Ripon, WI. He is an Adjunct Professor of Anthropology at the University of Wisconsin-Oshkosh and an Adjunct Scholar in

Anthropology at Ripon College. He is equally specialized in Archaeology and Ethnology, and has published extensively in both fields.

Dr. Steinbring and his wife, Sandra, have conducted research in Australia, Hawaii, seven Canadian provinces, ten American states, Bolivia, Scotland, England, and Portugal. His writings have been published in 13 countries, and in three languages. He is listed in the Who's Who In Canada, Marquis Who's Who In The United States, and in Who's Who In World Rock Art Research. Current investigations feature the archaeology of prehistoric boulder arrangements in North America, and the initial expressions of rock art in the western hemisphere.

In addition to working with numerous organizations around the globe, Jack is the Director of Archaeological Research for the Mid-America Geographic Foundation <http://mid-america-geographic-foundation.webs.com/>

The Mid-America Geographic Foundation is an archaeology organization dedicated to the preservation and protection of ancient archaeological sites in North America, mainly in and around Central and Northeastern Wisconsin. It is dedicated to public education regarding scientific, cultural and social aspects of these sites and of similar sites in North America.

Meet us at [Elie's Family Restaurant](#) - Banquet Room

4102 Monona Dr. Madison, WI 53716

[\(608\) 223-2040](tel:6082232040)

Elie's is in the Lake Edge Shopping Center at the corner of Monona Dr. and

Buckeye Rd. The Banquet Room is at the back-right portion of the restaurant. Arrive at 11 to enjoy lunch with like-minded friends news and old before the lecture, which typically starts around 12:30 or so.

**CELEBRATE SPRING AT FRANK'S HILL
MUSCODA, WI on March 19th & 20th, 2013**

Bid farewell to winter and welcome spring by observing the vernal equinox amongst the ancient effigy mounds at the Frank Shadewald property near Muscoda. On Tuesday evening, March 19th, people will gather to observe the final sunset of winter and to gaze at the night sky with the aid of telescopes provided by John Heasley and the Iowa County Astronomers. Another gathering to welcome the first sunrise of spring will be held on Wednesday, March 20th, at dawn.

Persons wishing to attend should gather at Frank's Hill by 6:30 p.m. on March 19th or by 6:30 a.m. on March 20th. The events are subject to suitable weather conditions. A short hike will be required to the top of the hill that offers a stunning view of the lower Wisconsin River valley.

Frank's Hill is located 2 miles west of Muscoda near the intersection of Hwy. 60 and Hwy. 193.

"After a long winter, it is time to celebrate the coming of spring. I am welcoming people of all religious beliefs to the sacred mounds on my property to say farewell to winter with the setting sun on Tuesday night and to observe the amazing rebirth of the spring sun on Wednesday morning as it rises in a direct easterly alignment over the effigy mound group. It is a remarkable sight and I feel privileged to share the special experience with area residents," said Shadewald.

Heasley said participants should feel free to bring their own binoculars or telescopes to the Tuesday night event. He said, "On the spring equinox, day and night are of equal length. As the sky darkens, we'll enjoy the first quarter moon, Jupiter and four of its moons, the Orion Nebula, Pleiades, and maybe Comet PanSTARRS. It's a thrill to be able to stargaze again at a site where we humans have been gathering for centuries."

Frank's Hill is on the National Register of Historic Places. A group of unique effigy mounds is situated on the east ridge where the event will occur, which looks across to the west ridge where a line of small mounds, thought to be calendar mounds, is situated. The site offers a panoramic vista of the area which once contained the highest concentration of bird effigy mounds found anywhere in the world, including the remnants of the giant Ghost Eagle mound with a wingspan of over ¼ mile.

To learn more about the equinox events or for directions,
contact Frank Shadewald at [\(608\) 739-3079](tel:6087393079)

The progression of comet Pan-STARRS across the night sky in March 2013 is shown in this NASA graphic. CREDIT: Science@NASA

Dave Weier notes that the comet Pan STARRS, will still be visible at this time, and may be an additional delight to observe (from Frank's Hill or otherwise). Here's hoping for clear skies!

"A good time to look is about 40 minutes after sunset. The comet may appear as a sort of exclamation point in the evening sky, with the point being the comet itself and its diffuse tail stretching nearly straight up from the horizon, JPL officials added."

Microerosion analysis - Robert

file:///C:/Users/Jim/Desktop/MES/A-File/Barnesville%20Site/Robert/micro.html

FROM JIM – DOESN'T WORK OBVIOUSLY

<https://lostworlds.org/tag/duhare/>

Thanks Jon for this link. Another connection, possible Irish, Chinese, and more giant indications too, as well as fireworks and goats. JIM

Those of us with Irish blood always knew our ancestors discovered America. This is just more evidence. I recommend anyone who hasn't read Tim Severn's book about his building of an Irish boat and sailing it to America. I think it's called the St Brendan Voyage.

Gentlemen,

To **Sign the online Petition:** <http://www.petitiononline.com/1179/petition.html>

For **Background:** http://www.cybergolf.com/golf_news/mounds_of_controversy_at_ohio_club

Regards,

Vance

Ohio is a state with rich native American heritage. We cannot tolerate the loss of an important piece of American history built by the Natives. Much of American history is already lost due to urbanization and farming clearance. It is time for all to voice our concern against the negligence and destruction of the native American sites.

I have sent the petition to 30 friends to get their participation in the petition.

Thanks for alerting us to this important issue.
